Career Objective

Fresher Software Developer passionate about building efficient, user-focused solutions. Skilled in core programming concepts, debugging, and continuous learning. I enjoy turning ideas into working applications and collaborating with teams to solve real problems. Currently open to entry-level developer opportunities. Seeking an opportunity to apply Java, Spring Boot, REST APIs, JPA, and MVC Architecture skills in developing scalable backend applications.

Education

B.Tech: (Computer Science & Engineering), Jawaharlal Nehru College of Technology Rewa | CGPA: 7.38 | 2021–2025

Technical Skills

Programming Languages: Java (OOPs, Collections, Exception Handling, Multithreading), C, C++, Python.

Web Technologies: HTML5, CSS3, JavaScript (Basics), Bootstrap, AWS (Basic).

Frameworks: Spring Boot, Spring MVC, Hibernate, JDBC, Servlet, Spring Data Jpa, Spring Security.

Database: MySQL, PostgreSQL, SQL.

Tools: Eclipse, VS Code, Maven, IntelliJ IDEA, Postman, Git & GitHub(Basic), pgAdmin, SQLyog

Internship Experience

Java Full Stack Developer Trainee, – JSpiders Training & Development Center Oct 2024 – Sep 2025

- Undergoing intensive training in Java, JDBC, Servlet, Hibernate, SQL, Spring Core, Spring MVC, Spring Boot, HTML, CSS, JavaScript and developed mini projects involving CRUD operations with real time use cases.
- Built multiple projects using Spring Boot and SQL, focusing on real world features like CRUD operations, validation, and reliable business logic implementation.

Java Developer Intern, – Elevate Labs 4 Aug 2025 – 20 Sep 2025

- Developed backend modules using Spring Boot, REST APIs, and MySQL.
- Worked on API integration, testing, and database connectivity.
- Learned Core Java (OOPs, Collections, Exception Handling), JDBC, REST APIs, Spring Boot basics, Git, and build tools (Maven, Gradle).

Projects

Event Management System

Tech Stack: Spring Boot, REST APIs, PostgreSQL

- Built a Spring Boot event management application with REST APIs and PostgreSQL.
- Implemented entity relationships for Events, Venues, Organizers, Attendees, and Registrations using JPA/Hibernate and layered architecture.
- Ensured clean, production-ready code through validations, exception handling, and API testing with Postman.

Employee Management DB

Tech Stack: Java, SQL, JDBC, MySQL

- Built a Java-based employee management system with full CRUD operations using JDBC and MySQL database.
- Designed normalized database schema with tables for employees, departments, and roles with proper relational constraints.
- Ensured clean, production-ready code through validation, exception handling, JSON-based API responses, and API testing using Postman.

Additional Information

Certification: Java Full Stack

Languages: Hindi, English
